HILLARY ONYANGO AMOLO

DATA ENGINEER

Email: hillaryonyango19@gmail.com | **Phone:** +254 759392156 | **GitHub** | **LinkedIn**

Professional Summary

I'm a passionate data engineer with 3+ years of experience developing scalable data pipelines, streamlining workflows, and transforming raw data into reliable, decision-ready datasets. Skilled in ETL development, dashboard creation, and analytics using Python, SQL, and BI tools, with strengths in database management, statistics, visualisation, and cloud-based processing. I hold a data analytics certification and am currently pursuing a 6-month data engineering program at LuxDev Academy alongside AWS data engineering certification. I enjoy building systems that integrate diverse data sources and convert data into actionable insight.

Technical Skills

- **Data Analysis & Visualization:** Excel, Tableau, Power BI, Python (NumPy, Pandas, Matplotlib,
- 5tPlotly.
- **Database Management:** SQL, PostgreSQL, MySQL, NoSQL (MongoDB), Data Modeling (ERD, Star/Snowflake Schemas).
- **Statistical Analysis:** Trend analysis, anomaly detection, predictive modeling, hypothesis testing, A/B testing
- **ETL & Data Pipelines:** Apache Airflow, dbt, data validation, data quality management, CI/CD for data workflows
- **Big Data Technologies:** Apache Spark (PySpark, Spark SQL), Hadoop ecosystem (HDFS, Hive), Delta Lake
- **Streaming & Real-Time Processing:** Apache Kafka, AWS Kinesis
- **Data Warehousing & Lakehouse:** Snowflake, Amazon Redshift, Google BigQuery, Data Lake/Lakehouse Architecture
- **Cloud Technologies:** AWS (Glue, Redshift, S3, Lambda), Azure (Data Factory, Databricks), GCP (BigQuery)
- **Programming:** Python, SQL, shell scripting (Bash)
- **Version Control & DevOps:** Git, GitHub, Docker, Kubernetes, Terraform
- **API & Integration Tools:** REST APIs,

Work Experience

PowerBI Developer

Podi Software Consultancy - Full-time

| *June 2023 - March 2025* | *Nairobi, Kenya*

- Built 5+ scalable data-driven web applications and integrated BI solutions (Tableau & Excel), enabling real-time reporting and reducing manual reporting efforts by 60%.
- Developed 100+ ETL pipelines and performed advanced data analysis using Python (NumPy, Pandas, Matplotlib, Plotly, Streamlit), reducing data ingestion time from 9 hours to 3 hours.
- Designed, optimized 30+ PostgreSQL databases, implementing advanced SQL queries, indexes, stored procedures, and data models, improving data retrieval efficiency by 40% and enabling faster, more accurate analytics and reporting.
- Managed version control using Git/GitHub, ensuring seamless collaboration, reducing code conflicts, and improving deployment speed.

- Collaborated with cross-functional teams to translate business requirements into technical solutions, enhancing decision-making speed and accuracy.

Data Analytic Intern, Hybrid

Ajira Digital Kenya

| *October 2022 - April 2023* | *Nairobi, Kenya*

- Created scalable data analytics systems using Python data analysis libraries (Pandas, Matplotlib, Plotly)
- Designed and created interactive dashboards with Power BI, Tableau, and Excel to support data-driven decision-making processes
- Implemented cloud-based solutions (AWS) for enhanced scalability, security, and data accessibility
- Maintained comprehensive documentation and version control using Git and GitHub
- Optimized SQL queries to extract, transform, and aggregate 50K+ records per workflow, boosting data processing efficiency and enabling faster, actionable analytics for business decisions.

Education

Bachelor of Science in Computer Science

Masinde Muliro University | September 2017 - December 2023 | Kakamega, Kenya

---

Certifications:

- Certified LuxDevAcademy Data Analyst
- LuxDevAcademy Certified Data Engineer (Completion April 2026)
- AWS Data Engineering(Completion, August 2026)

Key Personal Projects

Climate-Aware ETL Pipeline

Aimed at delivering scalable climate-intelligence, I engineered a data pipeline that ingests, processes, and analyzes weather data from 15 Kenyan regions, improving insight availability for **farmers, NGOs, and policymakers** by enabling data-driven, climate-resilient decisions while enforcing validation and quality checks for high-accuracy reporting.

FinBot – Personal Finance Chat Application

Built to improve personal money management, I developed a cross-platform mobile application with an AI-powered chatbot servicing 1,000+ test interactions, featuring financial analytics, 5+ dynamic visual dashboards, and multi-format message rendering, all supported by a REST-integrated backend and an accessibility-focused UI.
